HURRICANE RECOVERY

Operation Blue Roof

TEMPORARY ROOF REPAIRS

Operation Blue Roof is a FEMA-assigned mission of the U.S. Army Corps of Engineers (Corps that provides temporary plastic sheeting to roofs damaged by Hurricane Katrina.

Contractors will install a temporary plastic covering to eligible homes at **NO COST TO YOU!**

In order to have this temporary plastic sheeting placed on their roofs, homeowners must complete a Right of Entry (ROE) form to allow government and contractor employees on their property for damage assessment and sheeting placement.

For the Right of Entry (ROE) centers in your county, please call toll free 1-888-ROOF-BLU (1-888-766-3258). The ROE locations and county eligibility does change, so please check for updates.

Corps contractors assign roofing companies in a way that will get the greatest number of roofs repaired at the fastest possible rate, so it may not be on a “first-come, first-served basis.” In addition, not all roofs will be eligible. Roofs with greater than 50% structural damage, tile, concrete, and most flat roofs may not qualify.

For the latest ROE locations, and general information on this assistance, call toll free

1-888-ROOF-BLU (1-888-766-3258)

PLEASE NOTE: This plastic sheeting is for damaged and badly leaking roofs. This is a temporary repair and is not a 100% watertight seal. This sheeting is intended to reduce major roof leaks. This plastic sheeting is installed using strips of wood that are secured by nails and/or screws into the roof. You will need roofing repairs as a result of this installation process. Please seek permanent roofing repairs as soon as possible.
