

# Built from the Bottom Up

## Sediment Strata

Name \_\_\_\_\_ Date \_\_\_\_\_

### Analyze and Hypothesize Extension

Review the observations you recorded for the *Movers & Scrapers: Glacial Erosion* activity. Now that you know more about sediment, develop hypotheses (proposed explanations for observable phenomena) based on the following questions:

1. What did you observe about the sediment in the glacial erosion activity?
2. How many types of erosion are there? What type caused the rock erosion that happened in the glacial erosion activity?

**What did you observe? Did you see erosion happening?**
